PROFILE

Recent MSc graduate in Informatics and Computing Engineering, focused on frontend development and UI & UX. Completed an internship at ITSector on a frontend team for a major Portuguese bank's project, turning Figma designs into responsive pages using React and TypeScript. Also built accessibility and multi-role features for the ComPass platform, following WCAG 2.1 AA. Available immediately for a junior frontend developer role where I can keep growing in both development and design.

EXPERIENCE

Frontend Developer Intern | ITSector, Porto | Feb 2024 – Jun 2024

- Built responsive production screens from Figma designs using React and TypeScript, ensuring accurate implementation of design specifications.
- Managed application state with Redux and Zustand, keeping data flow predictable as screens grew.
- Connected the UI to Node.js backend services as part of the frontend team.

Computer Vision Researcher | INESC TEC, Porto | Feb 2026 – Oct 2026

- Built a retrieval model in Python (PyTorch) that ranks breast cancer aesthetic outcomes, improving accuracy over the baseline.

PROJECTS

ComPass (APPC) | React, Figma, WCAG 2.1 AA
Platform for the Associação do Porto de Paralisia Cerebral (APPC) that centralises functional profiles of people with functional diversity, connecting users, caregivers, and professionals. Frontend work: accessibility features following WCAG 2.1 AA and multi-role interfaces that adapt to the logged-in account type. Also helped design a Figma prototype of a future mobile app, built for presentation to APPC.

HealthSync | Figma, UI/UX Design
Mobile health app designed in Figma, with functionality similar to SNS24.

Bee Simulator | WebGL, JavaScript
A 3D-modelled scenery with an animated bee, a beehive, flowers, rocks, and animated grass. The user controls the bee through the environment, picking up pollen from the flowers and dropping it in the beehive.

TreeDesigner | Flutter, Dart, Figma
A genealogy tree builder mobile app where users can easily build and customise their tree using intuitive tools and templates.

SWC News | Laravel, PHP, Bootstrap, JavaScript, AJAX, HTML, CSS, PostgreSQL
A collaborative news website where users share news and give their opinions through comments and a voting system. Users can also add friends and filter the news based on those friendships.

Ticket Support Website | PHP, JavaScript, SQLite, HTML, CSS
A website where users create support tickets to report problems to the staff. Each ticket is assigned to a department and then to a staff member, who chats with the user until the issue is resolved and the ticket is closed.

Dissertation: Exploring Collaborative Image Retrieval Models for Predicting Breast Cancer Aesthetic Outcomes | Python, PyTorch, scikit-learn, NumPy, Pandas
A retrieval framework that brings collaborative filtering into multimodal image retrieval, jointly learning image-patient representations and query-candidate relevance to rank clinician-defined aesthetic outcomes.

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React / React.js, Redux, Zustand, responsive design, accessibility (WCAG 2.1 AA)
UI/UX & Design: Figma, prototyping
Backend: Node.js, PHP | **Database:** PostgreSQL, MySQL, SQLite
Mobile: Flutter, Dart | **Graphics:** WebGL, Three.js, D3.js
Version Control: Git | **Programming Languages:** Python, C, C++, Java, C#
Machine Learning: PyTorch, scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, Jupyter

EDUCATION

MSc, Informatics and Computing Engineering | FEUP, University of Porto | Sept 2024 – Oct 2026 | Grade: 17/20
ERASMUS+ Exchange Student | Technische Universität Wien, Vienna | Oct 2025 – Feb 2026 | Grade: 17/20
BSc, Informatics and Computing Engineering | FEUP, University of Porto | Oct 2021 – Jun 2024 | Grade: 15/20

LANGUAGES

Portuguese (Native) | English (C1) | French (A2) | German (A1)

EXTRA-CURRICULAR ACTIVITIES

Painting club, Porto | Karate (Gōjū-ryū), Matosinhos
